

SOMNODENT SUAD™ ULTRA

The SomnoDent SUAD™ Ultra, is SomnoMed's smallest and most durable design. Its sleek profile is lightweight with minimal mouth volume. It has a full casted frame that creates unbeatable strength. The SUAD™ Ultra allows for full vertical and lateral movement as well as easy titration.

WHY CHOOSE SUAD™ ULTRA?

- ◆ Proven results and patient comfort
- ◆ Ideal for those who grind or clench during sleep
- ◆ Great retention for the entire life of the product
- ◆ Easy adjustment
- ◆ Minimal profile in the mouth

The acrylic lining in the posterior supports full retention- complete arch is totally encapsulated by casted substructure to ensure that the dentition will not move.

Non-restrictive in movement, allowing patient to fully open and close their mouth, drink water, speak clearly, yawn, and take medication while wearing their appliance.

Protrusive advancement does not have fins that limit lateral movement and does not lock the upper and lower jaw together.

With its minimal profile and anterior opening, it has 20% more airway than the SUAD.

FDA 510(k) cleared, Class II Medical Devices supported by years of medical research, 3 year warranty.
